The image shows the MIT App Inventor 2 Beta web interface. At the top, there is a navigation bar with the MIT App Inventor logo and various menu items like 'Projects', 'Connect', 'Build', 'Help', 'My Project', 'Gallery', 'Guide', 'Report an Issue', 'English', and 'cprog2g@gmail.com'. Below this is a green header bar for the current project 'Omikuji', which includes a dropdown for 'Screen1', an 'Add Screen ...' button, and two buttons for building the app: 'App (provide QR code for .apk)' and 'App (save .apk to my computer)'. The main workspace is divided into two panels: 'Blocks' on the left and 'Viewer' on the right. The 'Blocks' panel shows a tree view of components, including 'Built-in' (Control, Logic, Math, Text, Lists, Colors, Variables, Procedures), 'Screen1' (Canvas1), and 'Any component'. The 'Viewer' panel shows a canvas with a teal backpack icon in the top right corner. A code block is attached to the canvas, starting with 'when Canvas1 ▾ .TouchDown' and followed by a 'do' block containing 'set Canvas1 ▾ . BackgroundImage ▾ to " omikuji_daikichi.png "'. At the bottom left of the viewer, there are warning and error indicators (0 each) and a 'Show Warnings' button. On the right side of the viewer, there are zoom controls (+, -) and a trash icon. At the bottom of the interface, there are 'Rename' and 'Delete' buttons.
